Subject: Re: Delta CEQ Strategy Session (UNCLASSIFIED)

You have been very busy lately. I went to the BDCP public meeting today. They again stated that DWR is the CEQA lead and BOR, FWS, and NMFS are the NEPA co-lead agencies. The lead agencies are meeting weekly to review ICF work products, etc. I overheard a sidebar between two people I do not know who said that DWR "took back" the engineering and is doing all engineering themselves.

Preliminary Admin draft EIS/R will be completed on 9 May. Preliminary check copy EIS/R will be completed 11 June. Public draft EIS/R will be released 29 June.

Yolo Bypass: Bio objective targets set at 15 years. 10 years to get through construction plus 5 years to see results. 20 actions are planned for the Yolo Bypass. The Yolo Bypass proposals/con measures are subject to change and will probably change after approval of the BDCP. It was an odd discussion.

It sounds like there has been quite a bit more work done on bio goals and objectives. Ch 3 - conservation strategy is 800 pages long. Whole BDCP doc is 7K pages.

Haven't figured out the adaptive limits for water ops yet. Mitigation will be for construction and physical features impacts. Sounds like no impacts from actual operations. I believe Ops is considers a consevation measure.

Subject: FW: Delta CEQ Strategy Session (UNCLASSIFIED)

When: Thursday, March 29, 2012 1:00 PM-1:30 PM (GMT-05:00) Eastern Time (US & Canada).

Where: TBD

Classification: UNCLASSIFIED

Caveats: NONE

Inquiring about your availability to attend a strategy session about how to respond to future CEQ Delta Data calls

Agenda would focus on: communication protocols, and teaming on Bay-Delta issues, integration with the Bay-Delta crosscut budget, and our existing tools which define projects by business lines.

Please share with key players.

Thanks,

Karen
